

CRUSHING MILLS mod. VM/40P-60P-80P-120P

Residues unloading nozzle

Motorized loading screw

The **ball crushers** series **VM/P** are dedicated to the crushing of dry materials of various kinds such as: **fusion slags**, **ashes** resulting from processes of carbonization, **crucibles** and **refractory materials**, etc. **The process is continuous, separating and filtering the dust** obtained from the process through an interchangeable **stainless steel net**. To remove metal residues (the uncrushed parts) it is necessary to remove the cover on the rotor and to activate the movement for the unloading. The material is loaded manually (optional: automatic loading through motorized screw). **Soundproof cabins** are available on request. The machines comply with the required international standards.

Technical data	VM/40P	60P	80P	120P
-Rotor entrance diameter	120 mm	160 mm	170 mm	170 mm
-Power	0,75 kW	1,1 kW	2,2 kW	5,5 kW
-Supply line	400 V/50Hz	400 V/50 Hz	400 V/50 Hz	400 V/50 Hz
-Weight	280 kg	380 kg	780 kg	1700 kg
-Dimensions mm	750x550x750	1300x700x1600	1510x1000x1960	1750x1300x1900
- Average productivity/h ashes and waste	10/12 Kg/h	20/25 kg/h	70/80 kg/h	120/150 kg/h
- Average productivity/h crucibles and borax	1/2 Kg/h	4/6 kg/h	12/15 kg/h	35/40 kg/h
